OPN Only Oracle Exadata 11g Technical Boot Camp

Duration: 3 Days

What you will learn

This course is available only for Partners.

The Oracle Exadata Database Machine is the only database platform that provides extreme performance for both data warehousing and online transaction processing (OLTP) applications, making it the ideal platform for consolidating onto grids or private clouds. It is a complete package of servers, storage, networking, and software that is massively scalable, secure, and redundant. With Oracle Exadata Database Machine, customers can reduce IT costs through consolidation, manage more data through the use of compression, improve performance of all applications, and make better business decisions in near real time.

This course delivers detailed, in-depth information about Exadata features and best practices. Partners will learn how the Exadata Database Machine is able to deliver extreme performance through software and hardware features. This knowledge will help the consultants understand how Exadata technology achieves its high performance and how to implement best practices for the Exadata platform.

A Live Virtual Class (LVC) is exclusively for registered students; unregistered individuals may not view an LVC at any time. Registered students must view the class from the country listed in the registration form. Unauthorized recording, copying, or transmission of LVC content may not be made.
