Using PeopleSoft 8.0 Academic Advisement - Online Course

Dauer: 0 Tage

Lerninhalte

Academic Advisement is a PeopleSoft Student Administration application that provides an automated analysis of a student's progress toward the completion of academic requirements. This course will teach you the concepts and procedures necessary to use the Academic Advisement application to perform what-if analysis, and create course substitutions, directives, and overrides. You will learn to generate academic advisement reports, what-if analysis reports, a self-service degree progress report, and a self-service what-if analysis report. In addition, learn to create a course substitution, a course directive, and a course override.

Learn To:

Generate various academic advisement reports

Create a course substitution

Generate what-if analysis reports

Create a course directive

Generate a self-service degree progress report

Generate self-service what-if analysis reports
