

Oracle SOA Suite 12c: Essential Concepts Ed 1

Duration: 3 Days

What you will learn

This Oracle SOA Suite 12c: Essential Concepts Ed 1 training introduces you to Service-Oriented Architecture (SOA) concepts, the SOA approach to development and integration and the functionality of the core components of SOA Suite 12c. Expert Oracle University instructors will help you use Oracle SOA Suite 12c to build enterprise applications that provide solutions to business problems.

Learn To:

Integrate business services using SOA approach.

Describe the functionality and features of core service components in Oracle SOA Suite 12c.

Explain the context of using each core service component of SOA Suite.

Address business challenges.

Understand how a SOA composite application is constructed in JDeveloper.

Benefits to You

By taking this course, you'll develop the skills to integrate your organization's applications into agile, reusable, service-based connectivity to reduce risk and respond faster to business requirements. Become more knowledgeable about SOA to help support your organization's SOA implementation.

Audience

Application Developers

Business Analysts

Project Manager

SOA Architect

Related Training

Required Prerequisites

Understanding of web service concepts such as WSDL, SOAP

Course Objectives

Describe SOA concepts and technologies

Describe the business benefits of adopting SOA in your organization

Describe the functionality and features of core service components in Oracle SOA Suite 12c

Explain the context of using each core service component, and business challenges they address

Describe the make-up of a SOA composite application

Explain how to virtualize and secure services

Describe how Oracle SOA provides customers real-time insight into their business

Describe how Oracle SOA simplifies integration with external trading partners and with cloud-based and mobile applications

Course Topics

Service-Oriented Architecture Concepts

What is SOA?

About SOA building blocks

How to adopt SOA?

Discussing SOA standards

Getting Started with Oracle SOA Suite 12c

About SCA service components supported in Oracle SOA Suite 12c

Explaining product components in Oracle SOA Suite 12c

Discussing management tools of Oracle SOA Suite 12c

Building SOA Composite Applications

About XML basics

Describing composite applications and service components according to Service Component Architecture (SCA)

About service design principles

Getting started with SOA composite application implementation in JDeveloper

Orchestrating Services with BPEL Process Components

About BPEL concepts and BPEL process features

Discussing basic programming constructs of a BPEL process

Communicating message data by using variables in the BPEL process

Consuming web services

Developing a BPEL process by using the BPEL process template provided by BPEL Process Designer

Connecting with Binding Components

Explaining Binding components

Describing JCA adapters

Describing REST adapter

Mediating Messages with Mediator Components

Discussing functionality and features of a Mediator component

Discussing context of using a Mediator component

Configuring a Mediator component with routing rules

Encapsulating Business Logic with Business Rules Components

Defining business rules

Using Business Rule service components in SOA Composites

Editing business rules by using SOA Composer

Implementing Human Activities with Human Workflow Components

Discussing Human Workflow service concepts

About Human Workflow architecture

Creating and defining Human Tasks

Integrating the Human Task service component in the BPEL process

Virtualizing and Securing Services

Discussing concepts of Enterprise Service Bus

Explaining functions performed by Oracle Service Bus

Creating and configuring services in Oracle Service Bus

Securing a SOA composite application

Managing, Monitoring and Troubleshooting Composite Application

About SOA composite application management

Deploying a SOA application

Monitoring composite instances

Discussing fault handling

Monitoring business activities

Enabling On-Premises Integration

How Oracle B2B is integrated with Oracle SOA to enable electronic document exchange between business partners?

How Oracle MFT works with Oracle SOA to handle file transfers?

Enabling Mobile and Cloud Integration

How SOA Suite simplifies mobile integration?

How SOA Suite simplifies cloud integration?
